French Fries

You have spent a few days working on the poster for the Happy Hamburger contest and after finishing it, you turn in two copies. One for the teacher to grade, and one to send in for the contest.

The next day your teacher comes to class and announces "Last night I went into the restaurant to turn in your posters. I decided to have a snack while I was there and as I was waiting at a table; I was reading some of the information they had on their menu. I thought that we could use some of it as part of our next assignment. I would like to teach you about the following things."

Put this in your portfolio!

- Using a color or a graphic as a background on the paper
- Using the transparent choice on a watermark
